Appendix B – Data Exercise Charts, NNSDFSC, Jan. 18-23, 2003

Data:
- Definitions of incidence incidents, prevalence-examples
- 14, 15, 16-obscure-is collected by many, needs clear definition, may be collected elsewhere

Sources:
- Less data on violence than S.A.
- Definitions
- Surveys
- Not much about arrest rates
- 13-14 Blank
- Truancy Rates-Definitions

Unsafe Schools:
- Suspension/expulsion data
- Violence criminal acts
- R/P data
- Gun-free data

UMIR’s:
1. Data systems-develop new or use existing?
2. Perceived data element.
3. Data collection grants-is there a model we can use?
4. Sixteen grants-what was learned? Florida, Utah-Web based
5. Drop-dead implementation date?
6. Recommended waiting one year until December 2004.
7. Reporting regulation timelines (USDE)
8. Active/passive consent issues
   - Quality of data
   - PPRA-Title IX or X

How are you Planning to Integrate your State’s Unsafe School Choice Option into UMIR’s?

25% of student body
3 years in row
Year 1-Assistance
Year 2-Action P1/TA
Action plan
Year 3-B
Suspension/expulsion data–MD (10 days or more)
Year 1-Assistance
Arson/Fire–MD (10 days or more)
Year 2-Action P1/TA
Bomb threat–MD (10 days or more)
Explosives–MD (10 days or more)
Year 3-B
Physical attach–Students/Teachers/Staff
Drugs attach–Students/Teachers/Staff
Sexual harassment–Students/Teachers/Staff

WA-Crime linkages
AL-Expulsion data-SIR and criminal defined offenses
AZ-Graduated-Definition-Year 1: Current data and school polices and program in place
Year 2: Adding criminal code data and risk and protective factor data from schools
MT & ND-Suspension/expulsion data
IA-Forcible felonies, assault (state criminal code)
   Individual who exercise USCO under provisions of victims of violent crime
FL-Expulsion and SESIR data (proposed)
   Gun-free schools report data (proposed)
TX-Suspension/expulsion data
CO-SAR data; firearms expulsions (both)
CA-Expulsions
KS- Suspension/expulsion data and gun-free
VA-Persistently dangerous definition in will be driven by the collection of crime and violence data process already in place.
ID & UT-Will fill in gaps in existing system
What Questions Would You like Answered Related UMIR’s?

- MT-If a state is already gathering the data elements through different means must it be gathered in one data base, or do we just have to be able to report on outcomes?
- UT-What are perceived data elements? The data collection grants funded by DOE disseminated?
- ID-Drop dead implementation date?
- UA-What’s the purpose? What will be done with this data? How does this relate to Homeland Security? Is there a model available?
- When will we know the reporting requirements to DOE?
- How will USDE report data back to the SEAs/Stats?
- Define “uniform” state? Or US?
- What about small schools? And their inability to collect data? (student confidentiality)
- Are there any other states looking at assets/protective factors in their “Persistently Dangerous” definition/criteria?
- What are states doing with their definition and data collection on truancy?

FL-We need survey effort to gather required data on prevalence, incidence, age of on set etc…but NCLB/PPRA requiring either actual parental consent if using Ed funds on parent notification LEA policy in place for survey administration using other funds-Why make it so difficult to gather required data? This may affect states’ data gathering efforts in this area. Is Gov’s portion one report and SEA 1 report or all together?
